

Module 1 Lesson 1 – Identify and Prioritize Compliance Inspections

EXERCISE 1 – Prioritize Workload (15 MINUTES)

Instructions:

Work through this exercise as a small group. Review the list of wells below and their associated background information. Identify in the table which wells are high priority wells to inspect. Then, identify the order in which you would inspect these wells (#1 being the first well you inspect). Then, answer question below table.

Well Name	Background Information	High or Low Priority	Order of Inspection (#) and Rationale
Theodore 23-5	Within the floodplain of a river.		
Rockstar 33-8	Plugged 2 months ago.		
Figgie 12-4	Completed for production 5 months ago.		
Taz 3-23	Located 2 hours from the office and inaccessible in the winter.		
Foxy 4-1	Within an area that has high erosion potential.		
Rooster 1-2	Plugged 12 months ago; no ES inspection since.		
Goldfinger 5-5	6 minor INCs in the last year.		
Montecristo 8-1	Operator has gone out of business in the last year.		
Outback 12-1	Currently being drilled adjacent to a riparian area.		
Ringo 3-1	Currently being constructed within a VRM Class II viewshed.		

1. What other information do you need to improve your inspection order?

ANSWER:
